

ERS-304
FLASHING MASTIC

HIGH PERFORMANCE FLASHING MASTIC

HEAVY DUTY VERTICAL SURFACE REPAIR MASTIC

Ecology's ERS-304 Asphalt Flashing Mastic is designed for use as a multipurpose repair mastic on vertical roof surfaces where a tenacious bond and pliable, non-sag qualities are required. Formulated with high-grade asphalt, non-asbestos fibers, special fillers, and plasticizers, this heavy bodied mastic has exceptional properties for use on flashing surfaces since it is designed to retain its troweled shape at slopes up to 90° even during high temperatures. ERS-304 is a highly effective adhesive for bonding heavyweight flashing membranes where extra support and superior performance are required. ERS-304 meets Federal Specification SS-C-153C, Type 1 and ASTM D 4586 for asbestos free products. It also meets most existing VOC requirements.

CONVENIENT TROWEL APPLICATION

ERS-304 can be applied to a clean, dry surface with a standard margin trowel. If the surface is porous or somewhat dusty, it is recommended that the surface be primed with Ecology's ERS-301 Asphalt Primer. Coverage rates for the roof cement will vary depending on the roughness of the substrate and the applied thickness and width of the material. ERS-304 can be used in conjunction with the application of asphalt based roofing materials on vertical and horizontal surfaces, such as: existing asphalt roofing, concrete, masonry, and metal substrates. ERS-304 is typically used to install flashing membranes, but can also be used as general-purpose repair mastic for sealing holes and open seams on flashings or horizontal roof mat surfaces. When used as a repair material, ERS-304 should have one of Ecology's polyester, or fiberglass reinforcing fabrics embedded into the still fresh mastic with the reinforcement covered with a second trowel application of ERS-304.

GENERAL DATA

Color:	Black
Application Rate:	Approximately 1/4 to 1/2" thick
Container Size:	5 gal
Weight:	57 lbs
Pallet Size:	36 pails
