

ERS-307-A

ASPHALT ROOF RESATURANT

ASPHALT ROOF RESATURANT EXTENDS THE LIFE OF ASPHALT BUILT-UP ROOF SYSTEMS

ROOF RESTORATION SAVES MONEY

With Ecology's ERS-307A Asphalt Roof Resaturant, an older graveled roof's life can be extended for years! Roof restoration can be done for a fraction of the cost that is required to perform expensive roof recover or replacement installations. ERS-307A uses a variety of selected, reduced-odor penetrating oils, non-asbestos mineral fibers, and highly refined asphalt to restore life to the existing asphalt top pour and rejuvenate dried-out felt surfaces. The result is a more flexible top pour, providing greater cold weather flexibility and waterproofing protection to the existing roof system that creates an excellent vehicle for embedment of new roofing gravel. In addition, since roof restoration is a recognized maintenance procedure, most tax laws allow costs to be written off in the year they are incurred.

VERSATILE APPLICATION PROCEDURES & USES

ERS-307A can be used as a maintenance item to recoat small areas of exposed felt surfaces or can be used to restore entire roofs. New built-up roof specifications are greatly improved by the use of ERS-307A as the new roof's top pour. On existing roofs, all loose gravel and dirt needs to be removed by sweeping, power washing, or power broom. The use of a roof vacuum is acceptable as long as the surface is free of embedded dirt. The material may be applied by brush or spray application. Coverage rates will vary with the dryness of the surface. After application, ERS-307A should be covered with new, clean roofing gravel.

GENERAL DATA

Color:	Black	
Application Rate:	Approximately 7-8 gallons per 100 sq. ft.	
Container Sizes:	5 gal	55 gal
Weight:	42 lbs	490 lbs
Pallet Size:	36 pails
