

ERS-401

BUR SYSTEM BASE SHEETS

FIBERGLASS REINFORCED BASE SHEETS

ERS-401 CONVENTIONAL BASE SHEETS

Ecology's ERS-401 is an economical base membrane which can be used as the first sheet under an Ecology modified cap membrane or within one of Ecology's hot or cold applied built-up roof systems. The membrane is reinforced with a heavy-duty, rot-resistant fiberglass mat, which is impregnated and then coated with weathering-grade asphalt. ERS-401 meets ASTM D4601-86 Type II and is considered a UL Type G-2 felt. The membrane has lightly dusted surfaces providing excellent interply adhesion during installation.

ERS-401 can be installed with Ecology's ERS-All Temp Asphalt, ERS-Hot Flex Modified Asphalt and, in certain specifications, with ERS-302 or ERS-309 Cold Process Adhesive. The roll has 2" and 4" guideline markings for ease of installation.

GENERAL DATA

Membrane Type	G-2
Roll Dimensions	3' x 108'
Roll Net Coverage	300 sq. ft.
Roll Weight	82 lbs.
Rolls Per Pallet	20 rolls
