

## ERS-8000-SA

SELF-ADHERED WHITE ELVALOY MEMBRANE

# WHITE ELVALOY SHEET FOR MAXIMUM REFLECTIVITY & COMPATIBILITY FOR USE AS FLASHINGS OR AS A SURFACE FIELD SHEET

### ERS-8000-SA OFFERS AN ADVANCEMENT IN MODIFIED ROOFING

Ecology's ERS-8000-SA belongs to a new generation of elvaloy membranes. ERS-8000-SA is formulated with polyester fibers, and proprietary polymers, to provide a unique waterproofing membrane. This new technology provides exceptional flexibility at low temperatures as well as maximum reflectivity and emissivity to reduce roof temperature. Ecology's ERS-8000-SA membrane offers excellent puncture resistance as well as the ability to handle thermal and mechanical shock.

### ENVIRONMENTALLY SAFE INSTALLATIONS

ERS-8000-SA is a self-sticking version of the sheet and comes with an SBS-modified adhesive and a 3" selvage for heat welding on one side for quick, error-free installation. The system requires one or more plies of Ecology's ERS-500 series base membranes. Applications with Ecology's cold adhesives provide an environmentally safe installation with no fumes that could be harmful to workers or be drawn into air intake systems to disrupt the workplace. Guideline specifications are available on request.

### GENERAL DATA

	<b>ERS-8000-SA</b>
Color	White
Surface	Smooth
Bottom	SA Adhesive
Thickness	75 mil 60 + 15 mil adhesive
Weight Per Roll	85 lbs
Roll Coverage	1.5 square
Rolls Per Pallet	20
