

ERS-8006

ELVALOY PIPE BOOTS

PRE-FORMED ELVALOY PIPE BOOTS

DESCRIPTION

ERS-8006 Pipe Boots are made of unreinforced elvaloy and are specifically designed as a prefabricated solution to seal pipes protruding from the new ERS-8000-FB or ERS-8000-MA roof system.

APPLICATION

The ERS-8006 Pipe Boot can be cut to fit over pipes of diameters from 1" to 4½". Cut horizontally along the "tier" of the ERS-8006 Pipe Boot that will ensure a snug fit around the pipe. Slide the Pipe Boot down over the top of the pipe. Position the base flange of the Pipe Boot squarely onto clean, dry ERS-8000 field membrane and heat-weld in place. Use ERS-303-U to caulk where the top edge of the ERS-8006, and pipe make contact. Apply a new stainless steel screw clamp around the top tier of the Pipe Boot.

LIMITATIONS

The ERS-8006 Pipe Boot is designed to be slipped over the top of a pipe. DO NOT VERTICALLY SPLIT the ERS-8006 Pipe Boot, wrap it around a pipe, and attempt to weld the split.
