

ERS-8008 & ERS-8009

ELVALOY PRE-CLAD METAL

24 GAUGE PRE-CLAD METAL SHEETS

DESCRIPTION

ERS-8008 and ERS-8009 Pre-Clad Metal is used for custom fabrication of metal pieces that can be heat welded to the ERS-8000 white DuPont Elvaloy® field membrane. It is ideal for fabrication of gravel stops, pitch pans, or equipment pad flashing covers for the ERS-8000 system.

INSTALLATION

ERS-8008 or ERS-8009 Pre-Clad Metal sheets have a coating of DuPont Elvaloy®. Cut and form the 4'X8' (ERS-8008) or 4'X10' (ERS-8009) 24 gauge material into the desired roof system part, allowing a flange of at least three inches for heat welding to the ERS-8000-FB or ERS-8000-MA white Elvaloy® field membrane.

GENERAL DATA

Dimensions	ERS-8008	4 ft x 8 ft, 24 gauge
	ERS-8009	4 ft x 10 ft, 24 gauge
