ERS-9000 ECO-CLAD

METAL ROOF SYSTEMS

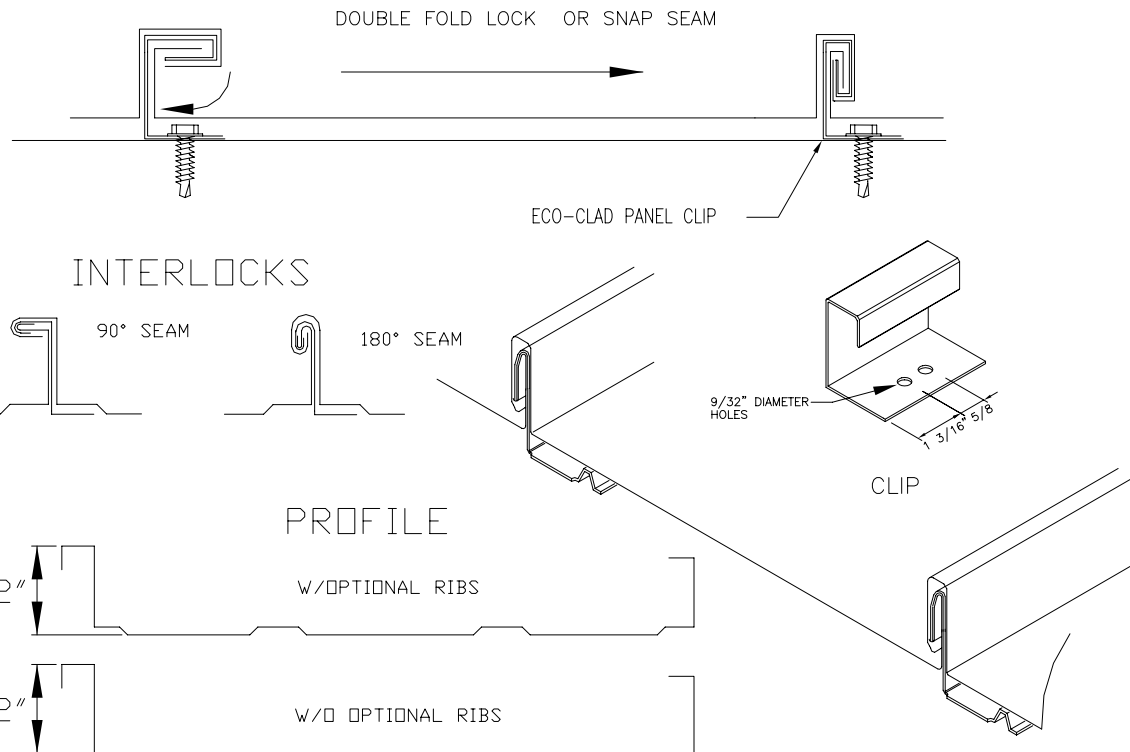

STANDING SEAM METAL ROOF SYSTEM PANELS

ERS-9000 ECO-CLAD METAL SYSTEMS

ERS-9000 Eco-Clad metal panels are designed specifically for standing seam roofs, mansards, canopies, gravel stops and fascia. Our panels are factory roll formed in continuous lengths. Standard on center dimensions are 14", 16" and 18". Custom color matching is available upon request. Our ERS-9000 Eco-Clad panels are perfect for any commercial or residential applications and are available in three popular metals including Galvalume, Aluminum and Copper. ERS-9000 Eco-Clad Panels are available in 24 gauge, with other thicknesses available.

THE RIGHT CHOICE OF COLORS AND FINISHES

Standing seam, mansard and fascia panels come in a variety of stock, premium and anodized colors. Finishes are available in Kynar 500 or Hylar 5000 resin, which resist chalking and fading. We offer standard and custom trim, produced in the same gauge and finish as the panels. Contact our main office or one of our local technical consultants for assistance on the proper system for your application.
