

ERS-RECOVER BOARD

RECOVER BOARD

ASPHALT IMPREGNATED FIBERGLASS PANELS PROVIDE FIRM EASY TO INSTALL SUBSTRATE FOR RECOVER PROJECTS

DESCRIPTION

ERS-Recover Board is an asphalt-impregnated sheet designed specifically for re-roofing applications where the existing substrate is uneven, is not able to withstand foot traffic, or where the existing substrate is not compatible with the new roof system.

FEATURES

ERS-Recover Board provides a strong, durable, easy to install, smooth surface for use with hot/cold asphalt built-up roof systems, or single-ply roof systems.

APPLICATION

ERS-Recover Board should be mechanically fastened to the roof deck or substrate with approved fasteners, or adhered with approved adhesives such as ERS-Insulhesive, ERS-302, ERS-309, or hot asphalt adhesives. All panels should be tightly butted and all panel courses should be staggered. ERS-Recover Board must be installed in good weather and is not designed for use as a weatherproofing membrane.

SPECIFICATIONS

Complies with all of the requirements of ASTM D 6506 Type 2, Class B

Thickness 1/8" Standard (Custom: 3/16" and 1/4")

Size: 4' X 5'

SHIPPING

Weight 20 lbs. per panel

Pallet Quantity 120 Sheets 2,400 lbs. per pallet
