TECHNICAL DATA SHEET

ERS-8000 Patch Kit

P/N: 035-0045

For Professional Use Only

Ecology Roof Systems has combined for you everything for patching various single roof systems, except the tools. Inside each 5 gallon pail kit we provide:

- 1 roll ERS-8000 SA Strip - 6" X 50' self-adhered White membrane tape
- 1 -1 lb box Trisodium Phosphate (TSP) - low-sudsing, alkaline cleaner

PREPARATION & APPLICATION:

NOTE: Only use ERS-8000 Patch Kit in temperatures at or above 70°F.

1. Mix a solution of Trisodium Phosphate (TSP) following the instructions on the box. Read and follow the safety hazard warnings, cautions, and directions on the box.
2. Wash surface to be repaired with TSP solution. Rinse with clean water and allow to dry completely.
3. ERS-8000 SA Strip can be cut to desired lengths and corners rounded using scissors.

NOTE: When overlapping ERS-8000 SA Strip, 6" end laps and 3" side laps are required. Material and surface must be warm (70°F minimum) to obtain proper adhesion.

4. Peel off the first two feet of release paper and adhere tape to substrate, being careful to maintain proper alignment. Start tape at least 2" beyond defect being repaired. Carefully unroll the tape, peeling back the release paper and pressing into place as you go. Avoid stretching strip or bridging surface transitions.
5. Small wrinkles are not desirable, but can be smoothed out by using a pressure roller; this will not affect the performance. Large wrinkles should be avoided and must be repaired by cutting and patching before the next layer is applied.

TOOLS REQUIRED:

Scissors, standard margin trowel, pressure roller.
