

This Detail Allows For Expansion  
And Contraction Of Pipes Without  
Roof Damage

NOTE:

1. Ecology reaffirms it's opposition to pipes and conduits being placed on roofs. However, where they are necessary and will not permit removal, a pipe support detail similar to the above design is recommended. The detail shown is generic only. Ecology also offers pre-fabricated pipe support stands. Consult with Ecology's Technical Services Department for design and placement of stands.
